

What do students need to understand about Geography as a subject/discipline?

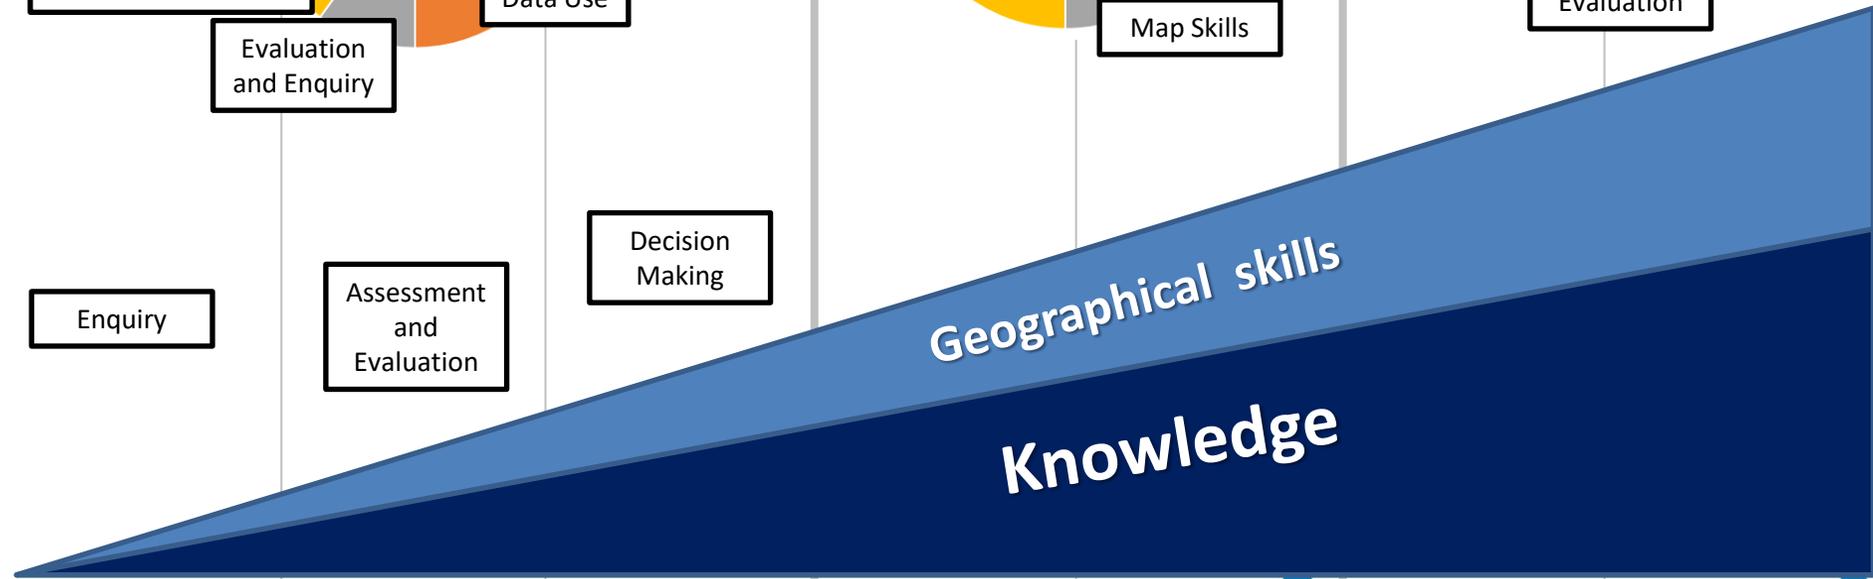

- Geography is a living subject and a solid understanding of place and our worlds physical features enhances and strengthens our life
- **Geographers use data and information in a social and a scientific manner therefore bridging social science and the natural sciences**
- **Geographers often have to assess and evaluate different aspects both within social and physical geography, thereby developing analysis, synthesis and evaluative skills. In addition this can be communicated in a written, verbal or digital form**
- Learning about our world community has the capacity to develop tolerance and understanding of countries and cultures in our world
